

Conectar SSMS a Dedicated SQL Pool

- Utilizamos el Dedicated SQL endpoint como enlace de servidor
- Utilizamos el SQL admin username como Login en SSMS
- Y la contraseña del workspace de Azure Synapse la utilizamos como password en SSMS

The screenshot displays the Microsoft Azure portal interface for a Synapse workspace named 'appworkspace9000'. The left sidebar shows navigation options like Overview, Activity log, Access control (IAM), Tags, and Settings. The main content area shows the 'Overview' tab with various properties and endpoints. Two specific fields are highlighted with red boxes: 'SQL admin username' with the value 'sqladminuser', and 'Dedicated SQL endpoint' with the value 'appworkspace9000.sql.azuresynapse.net'. Other visible details include the resource group 'data-grp', location 'North Europe', and subscription 'Test Environment'.
